Objective

To provide a concise technical and user reference for installing, configuring, using and maintaining FitBuddy AI.

Prepared for academic project submission

7. Project Documentation Phase

Project Overview

- FitBuddy AI is a web-based fitness-plan generator. It creates a personalized seven-day workout plan and a concise general wellness/recovery tip from user profile preferences, and supports feedback-based plan revision.

User Guide

- 1. Start the application and open the home page. 2. Enter a unique user ID and profile details. 3. Choose goal, intensity and experience. 4. Select Generate My Plan. 5. Review the overview and daily warm-up, workout, cool-down and notes. 6. Enter feedback to request a reasonable revision. 7. Review the updated plan.

Configuration Reference

- GEMINI_API_KEY: key for live Gemini requests.
- DATABASE_URL: database connection string; default uses local SQLite.
- WORKOUT_MODEL: configurable model for workout generation.
- NUTRITION_MODEL: configurable model for wellness tips.
- ALLOW MOCK_AI: permits mock output when live AI is not configured.
- ADMIN_USERNAME / ADMIN_PASSWORD: dashboard credentials; change defaults.
- MAX_FEEDBACK_LENGTH: maximum feedback length, default 1,200 characters.

Routes Reference

- GET / — home page.
- POST /generate-workout — form-based plan generation.
- POST /submit-feedback — form-based plan revision.
- GET /view-all-users — protected admin listing.
- GET /api/v1/health — service health.
- POST /api/v1/plans — create plan.
- GET /api/v1/plans/{user_id} — retrieve plan.
- POST /api/v1/plans/{user_id}/feedback — revise plan.

Troubleshooting

- Missing API key: add it to .env or enable mock mode.
- Model unavailable: configure a model ID available to the API project.
- Dependency errors: activate the virtual environment and reinstall requirements.
- Database issue: stop the server, back up needed data, then reset the local database only if appropriate.
- Admin login issue: verify environment credentials and restart the application.

Maintenance

- Keep dependencies and model IDs current; protect credentials; back up the database; review AI output quality; rerun automated tests after changes; update this document when routes, schemas or settings change.

Limitations & Disclaimer

- FitBuddy AI provides general wellness information only. It does not diagnose, treat or replace qualified professional advice. Generated recommendations may be imperfect. Users with health concerns or injuries should consult an appropriately qualified professional.
